

Sprint 3 Burndown Chart

The above screenshot represents the burndown chart of our group in Sprint 3. The planned velocity still differs from the actual velocity especially from the middle towards the end. However, compared to the previous sprint (Sprint 2), the curve resembles more to the planned velocity curve. This is due to members starting to get used to the execution of each sprint, leading the curve to be more desirable. On top of that, the velocity from Sprint 3 has also improved significantly from Sprint 2. Due to unforeseen circumstances, there are 2 user stories that was not fully completed and will be moved to Sprint 4.
